CREATE REALITY

IVunited

Development Plan at a Glance.

“CREATE REALITY” - IVunited's motto

IVunited is creating frameworks and programs capable of facilitating and automating the incubation of philanthropic projects. Our approach is rooted in biomimicry, evolutionary observations as well as the interdisciplinary convergence between fields of science, engineering, business and design. This strategic methodology allows us to design new and simplified ways to pave the road of philanthropic evolution.

IVunited is also looking at ways of uniting already existing efforts supporting causes around the world, starting with a focus on Greece and Cyprus. We are developing unification strategies that aim to increase the impact, innovation speed and coordination capacity of local, national and international philanthropy.

IVunited's long-term objective is to become an open-source platform able to incubate philanthropic projects through automated strategies thus providing open and free support to independent volunteers and NGOs worldwide.

IV UNITED

WHAT IT IS

An international NGO

A hub for innovative philanthropy & field unification between science, design, engineering, business and art.

An Innovation lab exploring new ways of designing humanitarian and philanthropic projects with the potential to scale.

A strategic agency designing and managing philanthropic and humanitarian projects for the public and private sector.

Innovating Philanthropic Action

Improving the way we tackle world challenges.

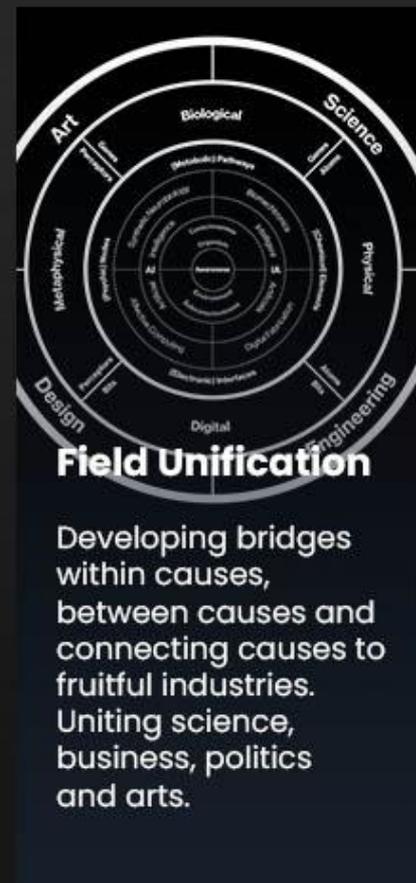

Design Thinking

Applying to humanitarian fields the kind of personalized methodologies that have benefited the ad industry for generations.

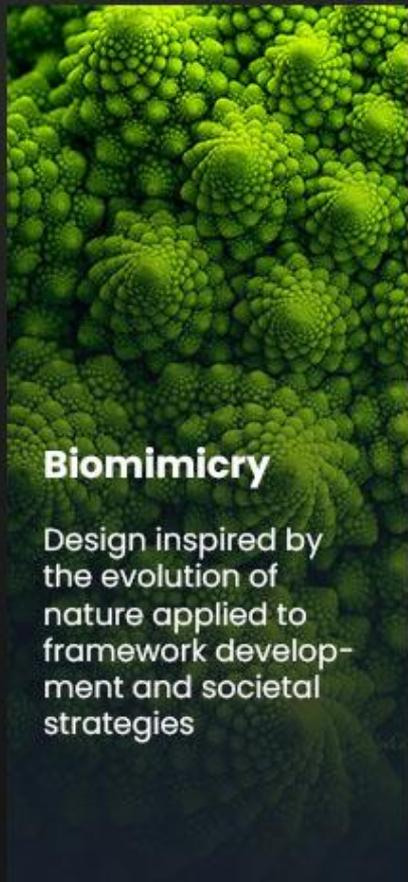

Agile Management

Smart project management frameworks applied to non-profit projects

Field Unification

Developing bridges within causes, between causes and connecting causes to fruitful industries. Uniting science, business, politics and arts.

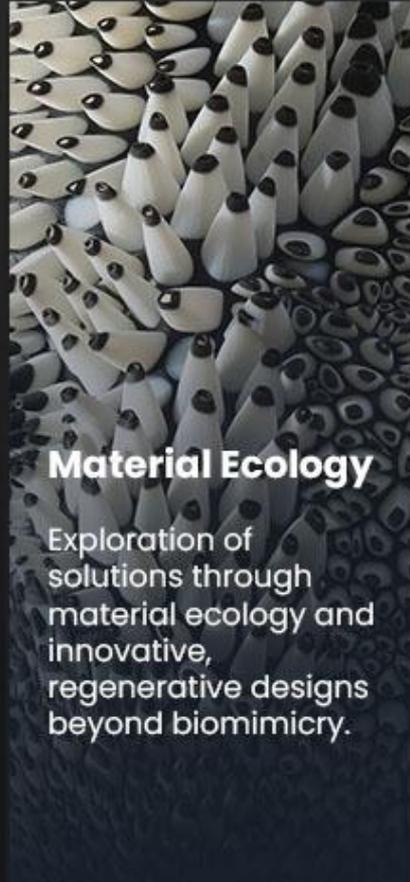

Biomimicry

Design inspired by the evolution of nature applied to framework development and societal strategies

Acceleration

Facilitating exponential growth & crowdsourced intelligence. Preparing humanitarian fields for the concept of technological Singularity.

Material Ecology

Exploration of solutions through material ecology and innovative, regenerative designs beyond biomimicry.

Tech for Good

Use and democratisation of bleeding edge technology at the service of humanitarian development and philanthropic goals.

Protopian Ideals

Striving for evolution, improvement, inclusion and authenticity over a quest for idealized perfection.

Human Centered Design

Putting life and human natural needs at the heart of all matters.

Interconnectivity & Holistic Thinking

Everything on our planet is connected. A bright future will come from the respect of life on earth in all its forms.

Open Development

The most valuable change often comes from overlooked and uncredited sources. We collaborate with Independent Volunteers above all else, meaning the individuals before the institutions or backgrounds they represent.

LIST OF ACTIVITIES

1

Research and studies focused on community development and philanthropic innovation.

2

Data analysis, mapping and modeling for the development and innovation of philanthropic and societal goals.

3

The design of projects focused on expanding activities, scaling humanitarian solutions and linking scientific, professional, cultural and philanthropic fields.

4

Design and management of projects and programs (Greek, European, interdisciplinary and inter-organizational) with the aim of innovative development of philanthropic frameworks and solutions.

6

Planning, development, production, and organization of events, press conferences, exhibitions, seminars, conferences and workshops of an educational nature on issues of community development, social inclusion and education.

5

Organizational coordination (communication and development strategies of common goals between existing governmental and non-governmental organizations as well as public and private legal entities).

7

Development of holistic strategies for the promotion, representation and internal communication of our goals.

Side Note.

Philanthropy vs. Humanitarianism

We use the term philanthropy more often than humanitarianism because our strategies generally focus on holistic plans for the long-term welfare of our planet and humanity rather than actions that have an immediate aspect of disaster relief.

Humanitarian actions are most often a part of our development strategies, but they are a piece of the puzzle rather than a final goal.

In this context, we refer to philanthropy as embedded altruism and dedication to long-term welfare strategies that address root causes of societal and environmental dangers.

Charitable donations are not the central point of philanthropy for us. In our eyes, our volunteers are philanthropists, and so is everyone who dedicates a piece of their life to a cause in a way that allows us to take smart steps in a greater common direction.

More Definitions.

IVunited was thus named to honor people taking into their own hands the actions needed to put an end to our world's horrors.

Behind the abbreviation **IVunited** is the name

Independent Volunteers United, and here is what it means to our organisation.

“Independent” : We are individually driven by our altruistic beliefs, coming from all fields, taking actions into our own hands.

“Volunteers” : We act because it is the right thing to do. We stand for what we believe in and will always prioritize our planet and its people over dogma.

“United” : We are independent volunteers of the world. Individuals, businesses and organizations, creating pieces of future together. We share a mission that is bigger than us, bigger than our backgrounds and cultures. This mission allows us to unite, coordinate and map out dreams of universal welfare.

IV's mission runs in your veins.

It's the calling that we all share. The one to protect our future, our world and the ones we love.

WHAT WE HAVE TACKLED UNTIL NOW

1 / 3

- **REFUGEE CRISIS** - Design and application of refugee camp development plans and integration strategies for refugee communities.
- **HUMAN TRAFFICKING** - Development and support of safe houses and relief missions.
- **GENDER EQUALITY** - development of strategies applied to communities of women in business.
- **CAUSE MANAGEMENT** - advocacy & shared open-sourced strategies for the branding, project design and management of causes.
- **CLIMATE CHANGE ACTIONS** - development of projects allowing to link climate change actions to national events and entertainment.
- **ENVIRONMENTAL CONSERVATION & ECOTOURISM** - development of economically inspiring plans for the development of ecotourism and support of environmental activism.
- **WILDLIFE CONSERVATION** - development of projects for the protection of endangered species.
- **ANIMAL WELFARE** - development of support strategies for independent animal sanctuaries.
- **RACIAL EQUALITY** - development of strategies focused on the support and integration of racially discriminated communities into actions aimed at the support and development of local and international communities.

WHAT WE HAVE TACKLED UNTIL NOW

2 / 3

- **LGBTQ EQUALITY** - development of strategies focused on the support and integration of LGTQ individuals and communities into actions aimed at the support and development of local and international communities.
- **CROWDSOURCED INTELLIGENCE** - development of platforms for the open-source incubation of philanthropic projects.
- **CAUSE UNIFICATION** - development of strategies and platforms allowing causes to unite their voices to communicate about their needs and offered resources.
- **BIOSTRATEGIES** - development of frameworks and strategies allowing us to root growth and progress in natural evolution rather than politics and economics. Development of plans allowing to merge business, tech and general progress with nature rather than opposing it.
- **CREATIVE CONSULTING > FICTION & STORYTELLING AT THE SERVICE OF PHILANTHROPY** - Advisory of studios, channels, production companies and artists on matters of topic selection, ethical representation and creative direction that allows to reflect the reality of causes as a way to contribute to their advancement through fiction.
- **BLEEDING EDGE FOR WELFARE** - development of strategies aiming to help emerging revolutionary industries to serve human and universal welfare and minimize its potentially dystopian impact. Fields of research and development:
 - > AI
 - > Robotics
 - > Longevity
 - > Biotech
 - > Bioengineering
 - > Nanotech
 - > VR / AR / MR
 - > IoT

WHAT WE HAVE TACKLED UNTIL NOW

3 / 3

- **RETHINKING EXCELLENCE** - Exploration of post-colonial dogma's influence on society and our resulting perception of culture, business and society. Exploration and Integration of diverse cultural and social influences into a new definition of professional excellence and cultural refinement.
- **ACTION AGAINST NON-PROFIT PLAGIARISM & PROJECT THEFT** - Exploration of ways we can prevent non-profit organisations from competing for funding and unite toward action instead > strategies leading to the development of fair share fund & equity division models.
- **FAIR SHARE INCUBATION MODELS & FAIR SHARE EQUITY DIVISION** - Design of frameworks looking to provide an alternative entrepreneurial incubation and growth model for businesses and startups. The objective of the Fair Share Model is to provide a solution to the more and more overwhelming wealth distribution gap in our society.

There is a lot to do to change the world.
